

## Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact [support@jstor.org](mailto:support@jstor.org).

## POLIOMYELITIS (INFANTILE PARALYSIS).

CASES AND DEATHS REPORTED BY CITY HEALTH AUTHORITIES  
FOR THE WEEK ENDED SEPTEMBER 21, 1912.

Place.	Cases.	Deaths.	Place.	Cases.	Deaths.
Buffalo, N. Y.	28	6	New York, N. Y.	11	
Chicago, Ill.	10	1	Oakland, Cal.	3	
Cleveland, Ohio.	10	1	Omaha, Nebr.	4	
Columbus, Ohio.	1		Philadelphia, Pa.	2	1
Dayton, Ohio.	1		Providence, R. I.		
Los Angeles, Cal.	4		San Diego, Cal.	1	1
Newark, N. J.	1	1			

## LOS ANGELES, CAL.

One case of poliomyelitis was reported at Los Angeles, Cal., during the week ended September 28, 1912. Three cases of the disease remained in the municipal hospital at the close of the week.

## BUFFALO, N. Y., AND VICINITY.

Passed Asst. Surg. W. H. Frost reports October 7:

During the past three weeks cases of poliomyelitis and deaths therefrom have been reported in Buffalo as follows, omitting cases reported as suspicious and not confirmed:

	Cases.	Deaths.
Week ending—		
Sept. 21	28	5
Sept. 28	14	1
Oct. 5	12	1

In Batavia, Genesee County, 21 cases with two deaths are reported as having occurred from August 26 to September 26.

The reports received from various other localities, while indicating an unusual prevalence of poliomyelitis throughout western New York, are not sufficiently complete to warrant a numerical estimate. The State department of health is, however, taking active measures to obtain full records of all cases.
